

Jessanol Ltd – Cyber Security Statement

1. Purpose

Jessanol recognises the importance of protecting information, digital systems and client data from cybersecurity risks.

As a digital-first business, we take a practical and proportionate approach to cyber security, using sensible controls to reduce risk and support secure service delivery.

2. Our Approach

Jessanol seeks to maintain appropriate security measures including:

- use of reputable business systems and software providers
 - strong password practices and secure authentication methods
 - controlled access to business accounts and data
 - regular software and device updates where practical
 - awareness of phishing, fraud and cyber risks
 - secure sharing of information and files
-

3. Data Protection

Cybersecurity forms part of our wider commitment to data protection and information security.

Where personal or sensitive information is processed, reasonable steps are taken to safeguard confidentiality, integrity and availability.

4. Incident Response

If a significant cyber or security incident is identified, Jessanol will take prompt steps to investigate, contain risk and communicate appropriately where required.

5. Continuous Improvement

We review our digital practices periodically and remain alert to evolving cyber risks.

6. Responsibility

Responsibility for cyber security sits with Jessanol leadership.

7. Review of Statement

This statement will be reviewed annually or as required.
